To whom it may concern:

I have worked with Reeder Concrete since I first started at Brookshire Grocery Company over 5 years ago. Since that time, they have completed several successful projects. A few of these include our new ground up Super 1 Food's store in south Tyler, our new pharmacy central fill facility in Tyler, and a full remodel at our Brookshire's store in Seagoville, Texas. On the Seagoville project they came in and completed the project that was started by another contractor that was not performing up to our BGC standards.

They are very attentive to their client's needs and expectations especially given the accelerated schedules we sometimes encounter when attempting to get a new store open. Reeder Concrete has been a great partner to work with as they are always doing whatever it takes to deliver a project both they and Brookshire Grocery Company can take pride in.

Based off my experience with them I feel very confident in recommending Reeder Concrete for any projects you any projects you might be considering them. I will gladly answer any additional questions you might have regarding my experiences with them.

Sincerely,
